Subject: Keep Line Sharing **As Is**

Please don't take away the line sharing rules that are in place. Doing this will hurt tens of thousands of consumers, shareholders, and startup business that need this to keep their ships afloat. I'm in Rochester NY where technology is as common as snow and people continue to lose jobs daily (Kodak, Xerox, Frontier, Global Crossing) I don't care what the government says. I see it every day. Your decision is crucial to thousands of people's financial stability. Please take this into consideration before acting. The pockets of the huge Bells are deep enough, support the little guy for a change. Thanks for your consideration

Sincerely,

Timothy Peters
